

The Stone Pony Tech/Info Rider

Updated 09/19/21. This rider has changed from previous versions and supersedes all those dated earlier than 09/19/21.

Facility GM: Caroline O'Toole cot508@aol.com

Production Manager: Alexa Mazurkiewicz alexa@asburyaudio.com 732 298 1188

Facility phone number: 732-502-0600

Load In and Parking:

Physical address: 913 Ocean Avenue, Asbury Park, N.J. 07712 [MAP LINK](#)

You will enter the Asbury Park Waterfront on Asbury Ave, regardless of the highway that you start from. As you approach the waterfront, make the left onto Kingsley Ave, which is the last traffic light before Ocean Ave. GPS will likely tell you to continue onto Ocean Ave from Asbury Ave, however this forces you to go around the block multiple times due to one way streets. From Kingsley Ave, you will make the 2nd right turn onto 2nd Ave. You will then make the immediate right into our private gravel lot at 2nd and Kingsley. This can be referenced as the yellow section in the parking map below. There may be a closed gate marked "private parking." If the lot is unattended when you arrive, you can open the gates, however, please close them behind you. Once in the lot, proceed to the southern end (the direction that you are facing on entry) and back any busses/trucks/trailers to the large (16') fence opening. Use the blue rectangle in the parking map below for a reference on where and how you should position your vehicles. Please leave enough clearance for your ramps/gates, as well as any other tour/support vehicles. If you are arriving well before your load in time, or leaving well after load out, please provide the PM, Brett with that information so that proper arrangements can be made as this lot is shared with several venues and we often have one tour pulling in as another is pulling out. ***Please note that we can no longer park any vehicles, other than those that fit into a single parking space on the streets unless the city has approved specific arrangements in advance. Street parking is metered and enforced year round. The venue and/or promoter will not be responsible for any parking tickets or fees related to on street parking. All buses, trucks and other artist/tour vehicles are required to vacate the venue parking lot no later than 2AM. Arrival times MUST be advanced for approval.***

- Load is a 150' (street level) push to the stage.
- You will load through a full size garage door into the venue.
- The stage is two steps up from ground level, a ramp is provided as needed.
- If you are arriving at or near your load in time, please contact the PM, Brett. If we have a clear street and your driver is not up against his/her drive time limit, we may be able to have you park on 2nd avenue for load in (20' push instead of 150') and then move your bus/truck to our lot.

TRASH: Please do not leave loose trash or garbage bags outside of your tour vehicles. A staff member can provide you with garbage cans or you can feel free to use the dumpsters that will be to your right. As we are an oceanfront community, there are large pigeons and seagulls that will make a mess of any loose trash, which results in complaints and or fines from the city and Clean Ocean Action. Any fines will be billed back to the band, booking agent, or promoter. Thank you for your cooperation in this matter.

Dressing Rooms:

There are 2 private and lockable dressing rooms, a common hospitality area, and a small private and lockable production office. These are located in the adjoining building. There is no public access to the building, however the route from the dressing rooms to the stage does require being outside (in a non public area) for about 40 feet. Each of these two dressing rooms is 19' x 20' and furnished. One has a private bathroom. There are two additional bathrooms and one shower in the common area.

Please note that in most cases the dressing rooms will close no more than one hour after the end of show.

Dressing Room 1

Dressing Room 2

Common Area

Internet:

WiFi is available throughout the facility. A hardwire (cat5) connection can be made in the production office if you are carrying your own router. Passwords change frequently but are posted throughout the venue.

FOH Audio:

Console:

- Avid SC48

PA:

- Dynacoustics 4 way quad-amped system, B&C loaded (4 flown tops, 2 per side, each top consists of 2x15", 2x10" and 1x2")
- Aux fed under stage subs, 8x18", (folded horn)
- Center Fill 1xVRX932LADP (internal power/processing)
- 2x Dynacoustics T151 (back room fills)
- 4x JBL AWC82 (outdoor fills)
- 1x JBL Control 30 (front door fill)

PA Processing:

- 1 DBX DR4800 DSP (main hang, subs and infills)
- 2 DBX DR260 (bar and outdoor fills)

PA Power:

- Crown Macrotech MA5000 (subs)
- Crown Macrotech MA5000 (low mids)
- Crown Macrotech MA5000 (high mids)
- Crown Macrotech MA600 (highs)
- QSC PLX3002 (back room and front door fills)
- Crown Drivecore 2 Series XLS 2502 (outside fills)

Monitor Audio:

- Soundcraft VII 48/16
- ***The Stone Pony does not have digital snake runs to FOH and utilizes copper splits.***
- 12 x ADRAudio M1225 wedges (internally powered and processed)
- 2 x ADRAudio U118 subs. (internally powered and processed)

THERE ARE NO SIDEFILLS IN THE STONE PONY DUE TO THE SIGHTLINE ISSUES IN A WIDE, SHALLOW ROOM. THE USE OF SIDEFILLS IS DISCOURAGED AT ALL SHOWS FOR THIS SAME REASON. YOU MUST MAKE ARRANGEMENTS FOR SIDEFILLS WHEN ADVANCING YOUR SHOW IF THEY ARE A NECESSITY

Mics:

- 12 Shure SM58
- 8 Shure SM57
- 1 Shure Beta 57
- 2 Sennheiser 609
- 3 Audix D6
- 3 Audix D4
- 4 Audix D2
- 2 Audix I5
- 5 Audix ADX51
- 3 Audix OM2
- 1 AKG D11
- 2 Samson CO2
- 3 DBX DB12 Active DI
- 9 DBX DB10 Passive DI

Misc Audio:

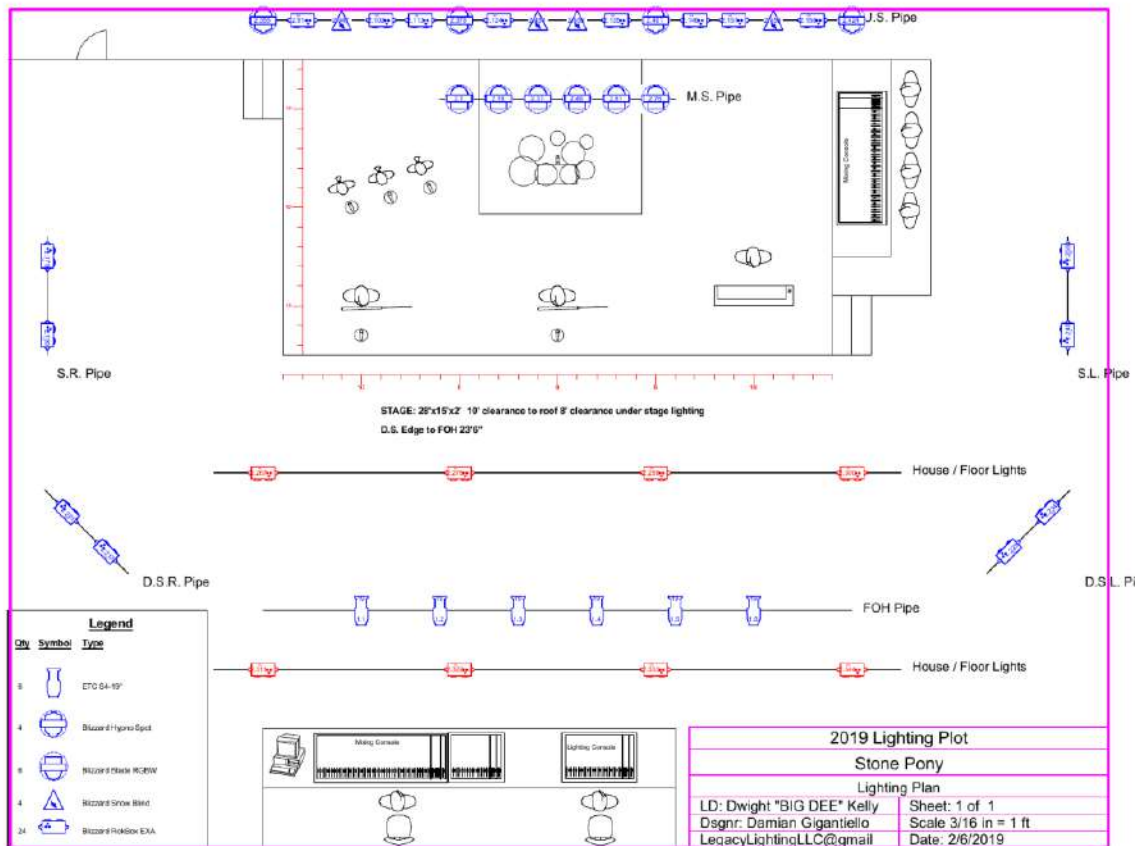

- 4 (8 channel) and 1 (12 channel) sub snakes
- 3 20 amp power drops, each on a separate circuit with 2 quad ends
- 1 20 amp downstage power drop with quad boxes every 8 feet
- 1 40 channel passive split snake

- 1 24 channel passive split snake
- 1 12 channel drive snake
- 80+ XLR in various lengths
- 40+ mic stands (tall/short booms and round base straight stands)
- 15 25ft Edison quad boxes
- 150A 3phase cam lock disconnect located offstage left, dedicated to audio including the house system

Lighting:

- Avolite Pearl Tiger console
- 16 Blizzard RokBox EXA
- 8 Blizzard Hotbox EXA
- 6 Blizzard Blade RGBW
- 4 Blizzard Hypnospot
- 4 Blizzard SnowBlind
- 6 19deg S4 Lekos
- 2 3pin DMX guest lines
- A single 150A 3 phase disconnect with cam locks dedicated to lighting is located 10ft from the USR corner of the stage.
- 3 20A circuits are located upstage in the ceiling for additional lighting; however, the house rig shares these circuits. Any touring lighting package pulling more than 30 amps at full draw will need to make arrangements to tie into our dedicated lighting disconnect. If you are not carrying a PD, please make arrangements in your advance, as we typically don't keep one onsite. Rentals can be arranged.
- Ceiling height is 12' from floor, 10' from stage.
- Up stage pipe trim height to the bottom of the lowest fixture is 7'8"
- Mid stage pipe trim height to the bottom of the lowest fixture is 8'3"

Lighting Plot

Blizzard Snow Blind 3ch	Snow Blind 1 2.447	Snow Blind 2 2.450	Snow Blind 3 2.453	Snow Blind 4 2.456				

Video:

- 1 x Marshall Electronics CV505-M broadcast camera located at FOH for distributed video throughout the venue on various 60" and 50" TV's. This feed DOES NOT hit any recording devices.
- Video and audio feeds also run to the TV in the dressing room common area.

Trim Height/Banners:

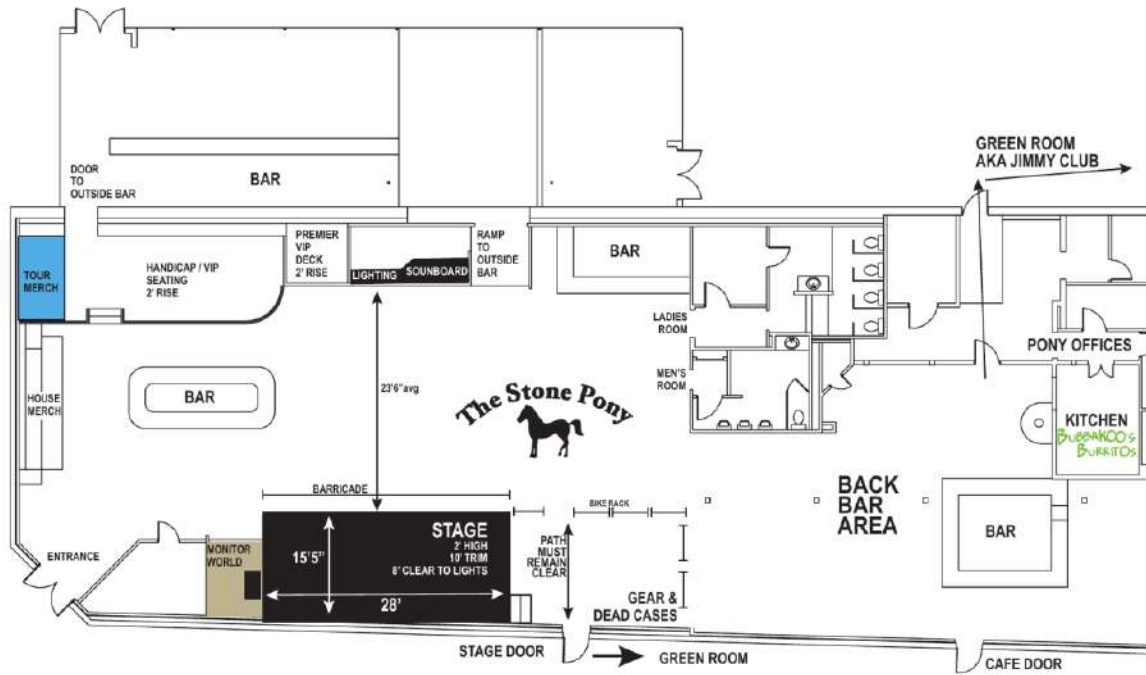

10' from stage, 12' from floor, 7'8" to lowest lighting instrument (up stage pipe) over the stage. *Because of an open wood truss roof construction, no rigging of any equipment to the ceiling truss is permitted.* A single upstage bar is available to hang banners and back drops, however, there is some obstruction from both the lighting rig and the roof construction itself. All banners and backdrops must have a current fire cert. A copy should be emailed during advance or presented to the stage manager at load in. Our fire marshal does a walkthrough before most shows and will always ask to review it.

Stage:

- 15'6"x28'x2' not including monitor world wing, diagram below.
- **The amp racks cannot be moved.** It is preferred that the house monitor console that sits on the amp racks stay in place, and that guest monitor consoles are set on the floor SR or SL. Any SR placement of a monitor or backline tech world **MUST** comply with emergency egress needs.
- A movable 8'w x 7'd x 15"h drum riser (2 piece construction) is available on all shows.
- Mojo style steel stage barricade can be utilized when requested. Management reserves the right to require barricade on any show.
- Bike rack is used to section off the gear pit and any tech worlds.

Main stage 15'6" x 28'	Moveable Drum riser 8' Wide 7' Deep 15" Height		Monitor World
